THE TREE THAT FRAMES THE TRUTH GROWS FROM THE KERNEL OF THE SEED TO THE ROOTS AND TO THE STEM, DIVIDING INTO BRANCHES AND BRINGING ITS FRUITS FOR THE DEVELOPMENT OF LIFE BY HERITAGE!

Introduction

A COUNTRY'S WEALTH IS NOT NECESSARILY BUILT ON ITS OWN NATURAL RESOURCES; IT IS ACHIEVABLE EVEN IN THEIR COMPLETE ABSENCE. THE MOST IMPORTANT RESOURCE IS MAN. THE STATE NEEDS ONLY TO CREATE THE BASIS FOR PEOPLE'S TALENT TO FLOURISH.
MARGARET TATCHER

- ❖ One of the leading projects that will soon be implemented by Us with your participation under the auspices and with the support of the UN within the framework of the International Integration Program "LIFE OF NATURE" is the project "Carbon Farms". This project forms and determines the ecological vector of innovative technologies of the Social Form of Public Development of our civilization, taking into account its impact on the habitat of the entire Human community on Planet Earth.
- ❖ In the face of future generations, we must make the right choice and determine our intentions and actions in relation to Nature itself, in order to undertake and apply all the means of Science and Technology available to us today for the cultivated restoration and transformation of the Biosphere of Planet Earth in order to preserve Human Life and the existence of its inhabitants.
- ❖ The 21st century must become a century of purification - purification from the mistakes of past years, in order to become a century of planetary ecology, information and technological breakthroughs. It is necessary to close the Peaceful Circle of Creators in the name of preserving all the values of Humanity and the Development of the "Concept of Life and Reason of Living Nature".
- ❖ At present, stating the facts of the growing threat of wars with the use of biochemical, nuclear, bacteriological weapons and catastrophic natural disasters, we are already aware of the growing problems of survival of human civilization itself. This is also due to the fact that the technocratic path of development, extracting natural resources free of charge for the sake of profit and comfortable existence in confrontation with Nature, leaves behind traces of production and consumption waste, toxic emissions, emissions from all types of transport into the atmosphere, soil and water environment of the Earth, which are, along with solar activity and other causes, one of the main causes of climate change threatening the existence of humanity and are a consequence of the main contradiction of the life of human society - the contradiction between the increasing needs of the growing standard of living to the detriment of the environment of its own habitat.
- ❖ By preserving the Ecology of Pure Relations with Nature, Preserving and Restoring its Flora and Fauna, WE Preserve the Energy of Life of Living Nature for Our Future!!!

LIFE ENERGY OF LIVING NATURE

- ❖ **Life** is a form of movement of the whole, manifested in energy exchange and metabolism, as well as in the exchange of information with the environment and having the properties of reproduction and self-preservation.
- ❖ **Each person and each creature** has an energy resource, which is a necessary and sufficient condition for its existence with the manifestation of their impact on the external environment, while simultaneously being in cause-and-effect relationships with other objects. In relation to a specific object, all the others form the external environment. The existence of an object is manifested in its ability to affect the external environment. At the same time, it is necessarily exposed to the impact of this environment. The content of interaction is the exchange of flows of various bioinformational energy, determining the sequence of their changes. Changes occur in a chronological sequence, where the sum of these changes is a life integral and represents a life cycle of mutual energy-informational exchange, which should contribute to the stability of maintaining the integrity of any complex system and the interacting connections between them.
- ❖ **The integrity of any complex system depends** on the state of mutually influencing and complementary connections: technical, economic, financial, interracial, cultural, scientific, ideological, etc. Our Task is not to determine the level of balance of ecological interaction, but to ensure that each of these levels is determined independently by each individual on planet Earth.
- ❖ **We ALL know** that the development of civilization is based on the constant growth of consumption, the energy generated by them and its uneven distribution in different directions and to different countries of the world, thus creating unequal access to the sources of this energy. With the growth of energy consumption (which already today exceeds 20 billion tons of equivalent fuel (tons of equivalent fuel) per year, and in 10 years, according to calculations, will double) environmental pollution is increasing catastrophically.
- ❖ Growing environmental pollution and disruption of the atmosphere's thermal balance are gradually leading to global climate change. Energy shortages and limited fuel resources are increasingly showing the inevitability of an innovative and unconditional transition to non-traditional, alternative and renewable energy sources.

UNCONDITIONAL FACTORS OF TRANSITION TO RENEWABLE AND ALTERNATIVE ENERGY SOURCES

- ❖ **Global-ecological:** Today, the fact of the detrimental impact of traditional energy-generating technologies (including nuclear and thermonuclear) on the environment is well known and proven; their use has already led and will inevitably lead to an increase in catastrophic climate change in the 21st century.
- ❖ **Economic:** The transition to alternative energy technologies will allow the country to preserve its fuel resources for processing in other industries, such as chemicals. In addition, the cost of energy produced by alternative sources is lower than the cost of energy from traditional sources. Prices for alternative energy are falling, while those for traditional energy are constantly rising.
- ❖ **Social:** The number and density of the population are constantly growing. At the same time, it is difficult to find areas for the construction of nuclear power plants and state district power plants, where energy production would be profitable and safe for the environment. The facts of the growth of oncological and other serious diseases in the areas of the location of nuclear power plants, large state district power plants, and fuel and energy complex enterprises are well known. The damage to the environment caused by giant lowland hydroelectric power plants also constantly leads to an increase in social tension in these places.
- ❖ **Evolutionary-historical:** Due to the limited fuel resources on Earth, as well as the exponential growth of catastrophic changes in the atmosphere and biosphere of the planet, the existing traditional energy seems to be a dead end. For the evolutionary development of society, it is necessary to immediately begin a gradual transition to alternative energy sources.
- ❖ **Political:** Those countries that are already fully developing alternative energy are able to lay claim to world leadership. China today receives more than 37 GW of energy and is a leader in this area along with Germany, the USA, Spain and Japan.

Of course, renewable energy sources do not lead to additional heating of the planet, and, in addition, their harmful impact on the environment (pollution of the atmosphere, soil and water) is generally much lower than traditional thermal power plants, hydroelectric power plants and nuclear power plants. With the introduction of 1 MW of capacity at solar, wind geothermal power plants, small hydroelectric power plants with an average generation of 2 million kWh per year, the emission of almost 2 thousand tons of carbon dioxide, up to 15 thousand tons of sulfur dioxide and up to 2 thousand tons of nitrogen oxides is prevented and 1-3 thousand tons of equivalent fuel are replaced (saved). Currently, according to the International Energy Agency (IEA), electricity production from non-traditional renewable energy sources is estimated at about 2.0% of total production, and this share will constantly increase. These energy sources create prospects for solving the energy problem in the future while simultaneously solving environmental problems.

THE TREE THAT FRAMES THE TRUTH GROWS FROM THE KERNEL OF THE SEED
TO THE ROOTS AND TO THE STEM, DIVIDING INTO BRANCHES AND BRINGING
ITS FRUITS FOR THE DEVELOPMENT OF LIFE BY HERITAGE!

ECOLOGY IS THE BASIC FRAMEWORK FOR FORMATION SOCIAL FORM OF PUBLIC DEVELOPMENT

- ❖ Taking into account the real events, when the situation in the world is becoming more and more threatening to the existence of mankind every day, both in connection with global natural disasters and with the increasing pace of military-political confrontation in International relations, which has a global tendency to develop conditions of extreme environmental disasters, where the socio-economic situation in many countries of the World will acquire a critically unstable character, we will form our relations in interaction with those who are interested in **BUILDING THE MAIN FOUNDATION OF THE INTERNATIONAL INTEGRATION PROGRAM "LIFE OF NATURE"**, AS THE BASIC BASIS OF ECOLOGY OF THE SOCIAL FORM OF SOCIAL DEVELOPMENT IN THIS MULTI-LEVEL AND MULTIPOLAR WORLD OF CONFRONTATION WITH NATURE ITSELF !
- ❖ The international integration program "LIFE OF NATURE" is aimed at improving the quality of HUMAN LIFE IN HARMONY WITH NATURE based on the use of environmentally friendly technologies optimized by digital and quantum control systems with elements of artificial intelligence, providing a set of urgent measures, including: 1) Ensuring energy security; 2) Ensuring biological safety; 3) Ensuring the needs of the population for high-quality drinking water that meets strict sanitary standards and environmental regulations; 4) Providing consumers with environmentally safe technical water in a closed production cycle; 5) Ensuring food security through technologies for the production of high-quality agricultural products, their processing and long-term storage without loss of nutritional value; 6) Reclamation and restoration of the original qualitative state of the soil and the environment itself through the introduction of innovative technologies, including the processing of industrial, household and biologically hazardous waste, thereby cleaning and restoring our living environment.
- ❖ Based on the above, ALL HUMANITY, having realized that it is constantly in the resonant-energetic solar-planetary electromagnetic fields, periodically feels their influence on itself, especially during the period of deep global catastrophic upheavals, is already beginning to deeply understand and perceive that, invading in its boundless ignorance of technocratic development on its path, in most cases it is improving, mainly due to the destruction of the LIFE OF NATURE ITSELF, in which HUMANITY ITSELF exists. This path poses a serious threat to the principles of sustainable development of the world economy declared in the UN and, together with it, the preservation of the planet itself and humanity itself, which, starting from the Middle Ages, chose the form of a technocratic vector of its development, and is currently on the verge of mutual self-destruction.

AND MANY OF US IN THIS WORLD, over time, awakening, WILL UNDERSTAND A LOT and will begin to consolidate spiritually on the path to creating and preserving the values of all HUMANITY AND PRESERVING THE LIFE OF THE PLANET EARTH ITSELF AND ITS NATURE !

SPIRITUAL CONSOLIDATION AND TRANSFORMATION SOCIAL FORM OF PUBLIC DEVELOPMENT

The goal of Spiritual transformation and consolidation of the human community is to satisfy the highest needs of each individual. And each person, revealing his abilities and his TALENT, having reached a high level of consciousness, becomes perfect in the physical, intellectual and spiritual plane.

The development of the Spiritual transformation of the human community must be considered from the position of integrity, systemicity, complexity and on the basis of the unification of all sciences and spiritual knowledge into a single interdisciplinary knowledge and only in understanding and in relation to the identified objectively set goal.

The material, mental and spiritual life of society are closely intertwined. The most active force is the desire of an individual and society as a whole to break free from the grip of material need and ensure freedom of development of the Personality. With an idealistic approach, an individual formulates the Goal as harmony of the Body, Soul and Spirit, and the main task as achieving the goal. Solving the main task and thereby achieving the goal is possible only by increasing the power and capacity of the collective mind of humanity, creating an industry of synthesis of thought, projected in the orthometric coordinates "Nature - Society - Personality" with conditions of equal access of people to material, mental and spiritual values.

Corporate use of innovative mechanisms makes it possible to increase the efficiency of development and implementation of the scientific and technical potential accumulated by modern civilization, as well as to ensure the manageability of the stages of design and implementation of the International Integration Program "LIFE OF NATURE" within the framework of approved and agreed final priority projects for the incubation development of "Carbon Farms" based on international and inter-industry cooperation of highly profitable industrial production of a new generation on the Basic elements of innovative technologies.

Motivational plans aimed at stimulating creative activity, the Human Creator and his materialized intellectual product with the corresponding consumer price make it possible to form sustainable segments of the development of the market of innovative technologies and services in the future, and this, in turn, will shift the vector in the redistribution of shares of attracted direct investments towards the High Technology Industry.

As a result, based on the majority of cases, each Person from a passive performer of a behavior program imposed on them by an alien External Environment becomes an active Creator and Maker on the principles of Expediency, Demand and Necessity, harmonizing simultaneously with the external environment of interaction and influence, while acquiring (based on the Communication Algorithms of the Integration Processes of Creatively Active Personalities) a Natural Environment of Manifestation in the implementation of positive and useful for society Development Plans in their Life on this Earth.

SYSTEM OF HARMONIZATION OF THE SOCIAL FORM OF PUBLIC DEVELOPMENT

HARMONY OF PAST, PRESENT AND FUTURE

	DEVELOPMENT SPHERE	PAST TENSE SPHERES	PRESENT TIME SPHERE	FUTURE TENSE SPHERE
1	Unity and harmony of past, present and future	The Knowledge Base and experience of past generations	Applying experience and knowledge from the past, following the principles of the future paradigm	Strategic decision-making based on the principles of creation
2	Creating a harmonious environment for realising an individual's creative potential	Generalisation of experience and knowledge from the past for the present and the future	Creating a worldview of the future	Integrity and harmony in the "Man - Nature - Society" system
3	The circle of Partners holding the integrity of decisions	Analysts and academics drawing trends from the past	Industry communities using predominantly nature-based technologies and solutions	Harmonious social systems that are self-sufficient and self-developing for the sake of the individual

EVENTS IN SPACE WE MERGE WITH TIME AND WEAVE

EVERYTHING AROUND US INTO A PEACEMAKING PATTERN !!!

DIGITAL MODELING and DESIGN

DIGITAL CODE - AS A TRANSMISSION MODULATOR, representing an **ORTHONOMETRIC SINGULATOR**, stitching together proportionate and disproportionate spatial metrics and the dimensionality of spatial states of objects and processes, taking into account the registration of the place, time and action of a **HUMAN** with a real change in his unmanifested state, determined in the manifested actions of a **HUMAN** when managing events according to the evolutionary laws of development of his creative activity.

All changes in society are analyzed through a single indicator - "time" and through a single criterion of effectiveness of human system development - the "time between" the identified goal and the reality where the world and each individual person are.

DIGITAL MODELING and PROJECTING is the computational analysis between the time interval from " α " to " ω " and their projection according to a scenario development plan.

 **TIME " α "** (α λφα) is "zero time", when a future need is formed in an individual at the level of thought formation.

 **TIME " ω "** (ω μέγα) is the realisation of each individual's need in society with more developed thinking and conscious productive activity.

The digital economy should be seen as an economy of agreed interests in real time between government, business, society and the interests of each individual.

Among the key tasks for the medium term, the design and methods for solving and implementing fundamentally new mechanisms for the development policy of the Basic Architecture for the creation of Transcommunication Centers for Project Management of Incubation Development of "Carbon Farms" have already been defined, the main goal of which is the formation of a system of Digital Economy of Advanced Development based on the management of authors - specialists with the necessary knowledge, skills, and competencies in the field of organizing effective management of their own projects based on digital financial and legal technologies.

CRYPTO-BASIS FOR FORMING ACCOUNT OF RECORD REGISTER IN A NEURAL NETWORK

COIN - Char-fait-in-g Ordinateur Indicative Namber

SIBRA code - Singulator of Inverse Biometric Recursive Algorithm.

TOKEN - Technological Ordinateur Key of the Elotational Neuromer (from the Name code to the registration number code) of an intangible and tangible asset.

Key - a sequence of symbols that is generated, stored, used and destroyed in accordance with cryptographic requirements and is used as control information in cryptographic transformations such as encryption/decryption, calculation of a cryptographic integrity check, generation/verification of an electronic digital signature.

The registry entry is the key to public recognition of any type of tokenized (digitized) asset and the legality of capital in this form! The protocol of the society's voting is the register of registers of records of the legality of capital in digitized form, the signatures on the protocol are the result of the vote. The title documents concerning a specific capital form the corresponding registers of accounting of digitized capital in space and time. The register of registers of the accounting record is the Act (protocol of examination) of public recognition of the legality of digitized capital. At the same time, for each register, the protocol indicates the deviation from the size of this digitized capital, the result of the deviation is the mathematical assessment of the reliability of the information.

Crypto Symbol is a cryptographic information matrix that is a means of packaging, encoding and transporting information of very high density.

Cryptographic Information Matrix - a converter of incoming information into a combination of Transmission cryptographic codes. The use of matrices with a transmission code in the field of issuing electronic money (crypto-currencies) will in turn provide a solution to problems in all areas of management and control of the socio-economic development of countries and puts it beyond competition. At the same time, its implementation does not require ultra-high technologies, since the matrix is not a technological development - it is a new mathematical solution.

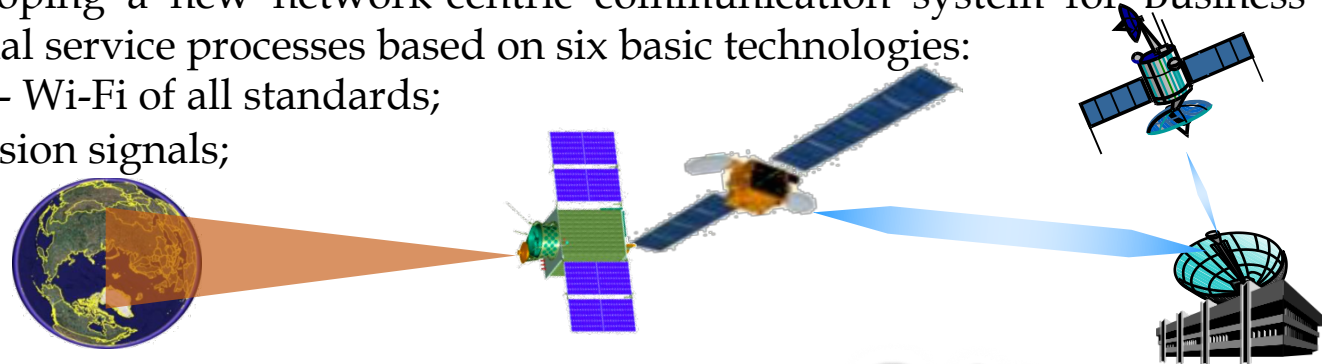

NEURON is an element of a decision rule (or a network that makes the final decision) capable of assessing the distance between a controlled fragment of a biometric standard and a similar fragment of the vector of orthonometric parameters presented for comparison.

THE TREE THAT FRAMES THE TRUTH GROWS FROM THE KERNEL OF THE SEED

ITS FRUITS FOR THE DEVELOPMENT OF LIFE BY HERITAGE!

BASIC SUPPORT FOR THE DEVELOPMENT OF THE CARBON FARMS PROJECT

- The basic support of the Digital Ecological Experiment and the construction of a Network-centric Architecture for the Management of incubation development projects of "CARBON FARMS" within the framework of the implementation of the INTERNATIONAL INTEGRATION PROGRAM "LIFE OF NATURE" is the existing system of Mobile communication operators around the world and the infrastructure of their service network.
- Based on this technological base and organizational foundation, we propose the creation of a NETWORK-CENTRIC DIGITAL ENVIRONMENTAL MONITORING SERVICE, simultaneously providing services of Universal Telecommunications Operators, which will operate and service satellites of their own local base of the digital Cross-Platform «CARBON FARMS^{BT}© SATELLITE SYSTEM^{IDC}».
- Our joint organizational approaches will provide us with the opportunity to create universal telecommunications service operators or Business Integration Service Operators from the main communications operator X-Mobil Trust Telecom, which will be able to: firstly, provide all telecommunications, information and telematic services, and secondly, develop new areas of services that are not provided by anyone today.
- We are currently at the start of developing a new network-centric communication system for Business Integration and support of multifunctional service processes based on six basic technologies:
 1. Wireless broadband access technologies - Wi-Fi of all standards;
 2. Technologies for delivering digital television signals;
 3. Mobile communication technologies;
 4. Satellite communication technologies;
 5. Fiber optic communication technologies;
 6. Quantum communication technologies.

THE TREE THAT FRAMES THE TRUTH GROWS FROM THE KERNEL OF THE SEED TO THE ROOTS AND TO THE STEM, DIVIDING INTO BRANCHES AND BRINGING ITS FRUITS FOR THE DEVELOPMENT OF LIFE BY HERITAGE!

BASIC SUPPORT FOR THE DEVELOPMENT OF THE CARBON FARMS PROJECT

- Today, services on the telecommunications market are represented by a variety of operators, each of which offers its own service, almost in no way connected with the others.
- We, together, creating on the basis of the Network-centric Architecture of Tensor Control with Distributed Neuronodes the structure of decentralized digital Cross-Platforms «**CARBON FARMS^{BT}® SATELLITE SYSTEM^{IDC}**» are forming a system of Business Integration with a developed network of Universal operators and providing a wide range of telecommunication services with the simultaneous implementation of six projects:
 1. Construction of a distributed computing infrastructure in the form of a set of nodes connected by a high-bandwidth core network with a broadband access infrastructure, such as a network of radio bridges with Wi-Fi base stations covering the entire service area.
 2. Installation of RFID readers throughout residential, transport and industrial infrastructure.
 3. Creation of an infrastructure of home routers-set-top boxes with a Reversible Code Improviser (DexTopRiBox) for the delivery of television signals and provision of broadband Internet access.
 4. Creation of a SIM card infrastructure designed as a virtual mobile operator (MVN X-Phone SSS - Mobile Virtual Network X-Phone Secure Satellite System).
 5. Creation of an infrastructure for the development of telematic services - a crypto-payment service network-centric system of the Mobile Trust Telecommunications Digital Bank, which, on the basic basis of the digital Cross-Platform «**CARBON BANK^{BT}® SATELLITE SYSTEM^{IDC}**», will ensure the processing of processing and conversion of transactions of all types of transactions from all addresses and subscriber card accounts linked to them within a single, highly convenient user interface.

CREATION AND LAUNCH OF A DIGITAL BASE PLATFORM «CARBON BANK^{BT}®»

- ❖ THE ACADEMY OF CYBERNETIC TECHNOLOGIES AND FINANCIAL AND LEGAL MANAGEMENT, TOGETHER WITH THE AUTHORS AND CO-AUTHORS - CO-OWNERS AND PARTICIPANTS OF THE DIGITAL INTEGRATED PLATFORM «IMPERIUM DE©A®T CAPITAL^{BT}®», FOR THE PURPOSE OF IMPLEMENTING THE INTERNATIONAL INTEGRATION PROGRAM “LIFE OF NATURE” BASED ON THE CREATED CROSS-CHAIN PLATFORM «CARBON BANK^{BT}® SATELLITE SYSTEM^{IDC}»:
- Generates TOKENS AND CRYPTOCURRENCIES (electronic money) with the simultaneous release of unique gold coins with a code for targeted project financing in a ratio dependent on the profitability of the project, and at the same time creates a closed-loop system for the entire technological chain of development and management of settlement and commodity production relations, where all input and output parameters are defined in advance.
- Provides control and certification of the security of financial and legal transactions during the implementation of projects, implementing an electronic monitoring system on an orthometric-singulator basis, displaying all input and output parameters of transactions on electronic certificates and simultaneously ensuring object- and subject-oriented identification of actual parameters.
- Together with partners, under the auspices of the UN, it begins implementing International and Interstate national investment projects in the Digital Economic Space using national cryptocurrencies and tokens with target payment codes, thus ensuring crypto-protected settlements with subcontractors, suppliers and employees.

FUNCTIONAL PURPOSE OF THE CROSS-PLATFORM OF THE DIGITAL BANK «CARBON BANK^{BT}© SATELLITE SYSTEM^{IDC}»

The digital bank platform provides an opportunity for every person and company, both resident and non-resident, to open an account on this platform and have their own personal account, connect a mobile application, issue plastic or digital payment cards. These mobile applications and payment cards should become the basis for mutual settlements, gradually eliminating the need for fiat transactions and international payments.

Identification of participants and registration of transactions is provided by the ID number (or the company registration number), with the assignment of an identification tax code, and other parameters provided on our Basic Cross-Platform «CARBON BANK^{BT}© SATELLITE SYSTEM^{IDC}», but at the same time, account holders may have the opportunity to post additional information on all types of activities, including the range of goods and services and their prices that they offer for sale/sale, which will allow digitizing the process from the initial cycle of production of goods and services to the final sale with payment directly on the platform.

The functionality of the Cross-Platform of the Digital Bank «CARBON BANK^{BT}© SATELLITE SYSTEM^{IDC}» has an unlimited ability to scale and transfer registered records from the database backup and add additional groups of records of economic or financial activities and market participants, which allows expanding the boundaries of spatial-temporal coordinates from the main orthometric axis of the DIGITAL CROSS-PLATFORM «IMPERIUM DE©A®T CAPITAL^{BT}©».

FUNCTIONAL PURPOSE OF THE CROSS-PLATFORM OF THE DIGITAL BANK «CARBON BANK^{BT}© SATELLITE SYSTEM^{IDC}»

Qualified monetization of the region

Payment circulation of cryptocurrencies in accordance with the index between the price of consumption and the cost of manufactured products, determined by commodity-money relations

Monetization coefficient of cryptocurrencies

Determining the possibility of using cryptocurrency payment methods in the regional economy in combination with intellectual resources involved in economic turnover while observing socially guaranteed standards of human life

Potential of Monetization Coefficient of Cryptocurrencies

The potential is determined by the possibility of indexing the payment power of cryptocurrencies in compliance with the norms of stability of currency regulation

Digital Investment platform

Consolidation of intellectual and financial resources and new methods of organizing the process of financing and implementing projects and programs, starting from the idea stage and ending with the implementation of the results of the idea's implementation in domestic and foreign markets.

HIGH - TECH INDUSTRY

Activation of activities on the exchange of knowledge and technologies between enterprises and Research Institutes with simultaneous training and internship of highly specialized specialists, both within the Country and abroad, in the International Digital Technoparks "High Technology Industry" created in Special Economic Zones in accordance with international legal norms, which are the Basic Integration Platform, with the aim of ensuring the transition of economic sectors of the WORLD to qualitatively new technological levels.

PRIORITY PROJECTS FOR THE INCUBATION DEVELOPMENT OF "CARBON FARMS"

On this platform, prerequisites are created for the implementation of priority projects of the international integration program "LIFE OF NATURE", where the supporting basis is the World experience and practice of applying scientific and technical developments in production based on the implementation of high innovative technologies, as well as stimulating the results of scientific research and creative activities of authors, due to which the Harmonization of relations between society and the individual is ensured, leading to a steady growth in the potential of the State Economy and the National Heritage of the Country with the creation of general prerequisites for the formation of the Highest state standard of quality and duration of the creative life of a HUMAN.

Administrative and organizational measures and creation of prerequisites for the development of the Transmission Investment Platform and optimization of the launch plan of the International Integration Program "LIFE OF NATURE" are at the preliminary stage of readiness and at the stage of formation of Mobile Intelligent Project Management Groups through the development structures of holdings with the creation of SPECIALIZED DIGITAL SERVICE PLATFORMS OF ENVIRONMENTAL MONITORING in all regions of the Countries of the WORLD

AND WE CAN TOGETHER CREATE all the necessary conditions for the implementation of a fundamentally new approach to the formation of effective digital financial and legal mechanisms for the development of integration processes in a single constructive global economic space with the simultaneous transformation of the existing World Financial Architecture, which in the future will inevitably and certainly lead to the HARMONIZATION of relations of the World community in all SPHERES OF HUMAN DEVELOPMENT and their PEACEFUL coexistence!!!

AND WE ARE ALREADY ON THE THRESHOLD OF THE LAUNCH OF THE INTERNATIONAL INTEGRATION PROGRAM "LIFE OF NATURE" WITH A UNIQUE FORMULA OF THE INDEX OF RESTORATION AND DEVELOPMENT OF THE ECOLOGICAL CONTOUR OF IMPLEMENTATION OF INTERNATIONAL INNOVATIVE PROJECTS, which together creates and forms universal opportunities for the implementation of a new supranational Architecture of countable - digital money emission and the singulation of common plans for different cultural, national, public and state entities on PLANET EARTH !!!

Key factors supporting the growth of innovation activity in countries, which will be taken into account when implementing digital programs and projects

- ❖ Creation of financial and legal mechanisms that mediate the accumulation, distribution and targeted use of investment resources, both budgetary and extra-budgetary.
- ❖ Creation of comprehensive programs to support innovation, which is an important missing link in the development of innovative activities in each region.
- ❖ Creation of a regulator that will act as an information and analytical center and ensure support and successful implementation of innovative projects.
- ❖ Creation of the required quantity and quality of services that provide innovators with real practical assistance in implementing projects.
- ❖ Use by subjects of innovative activity of the architecture of information interaction that meets their needs in terms of the level of communications, volume and quality of information services provided.
- ❖ Increasing demand for innovative projects, products and services from industrial companies, venture funds and other potential consumers.
- ❖ Creation of a regional government order for innovation.
- ❖ Creation of a regulatory framework for the regulation and circulation of digital payment instruments, allowing all participants in the innovation process to effectively implement innovative projects.
- ❖ Creation of effective financial instruments that ensure the participation of banks, venture funds, and investment companies in the financing of innovative projects.

The policy of increasing investment activity, supporting high living standards and moral ideals, together with the rich experience of the older generation and TALENTED youth, will create favorable conditions for the consolidation of all international creative potential with their worthy positioning in the AREA of the CREATOR - the CREATOR, carrying out his historical Mission in the Name of LIFE ON EARTH

TO THE ROOTS AND TO THE STEM, DIVIDING INTO BRANCHES AND BRINGING
ITS FRUITS FOR THE DEVELOPMENT OF LIFE BY HERITAGE!

The Key Task of the Digital Economic Experiment

- ❖ The Digital Economic Experiment should combine the advantages of those states that strive to integrate all energy and scientific potential, offering the world a new global project in the interests of all Humanity - the creation of a new Transmission Financial Mechanism of the Digital Economy, which will allow in the future, on the one hand, to remove restrictions on innovative industrial development and transform the potential of MAN - the CREATOR into an arena of universal cooperation in the name of preserving LIFE on EARTH.
- ❖ All nations will be able to participate in this project. They will really all work together for their common future. This project will become a real continuation of all territorial and technological advantages for all States and Nations of the World!
- ❖ By implementing this project, the participants of the Digital Economic Experiment will become the financial, technological and innovative leaders of the World!
- ❖ The innovative support for the implementation of this project will be a new scientific paradigm of a completely unique financial accounting and digital system, giving new energy for the real digital transformation of the economy of each country, its people and the World community as a whole.

THE SUM OF TECHNOLOGIES THE SET OF TECHNOLOGIES WITH WHICH WE BUILD RELATIONSHIPS WITH NATURE

THE LOGIC OF CONNECTION OF THE MAIN ELEMENTS OF THE DIGITAL TRANSFORMATION OF THE ECONOMY

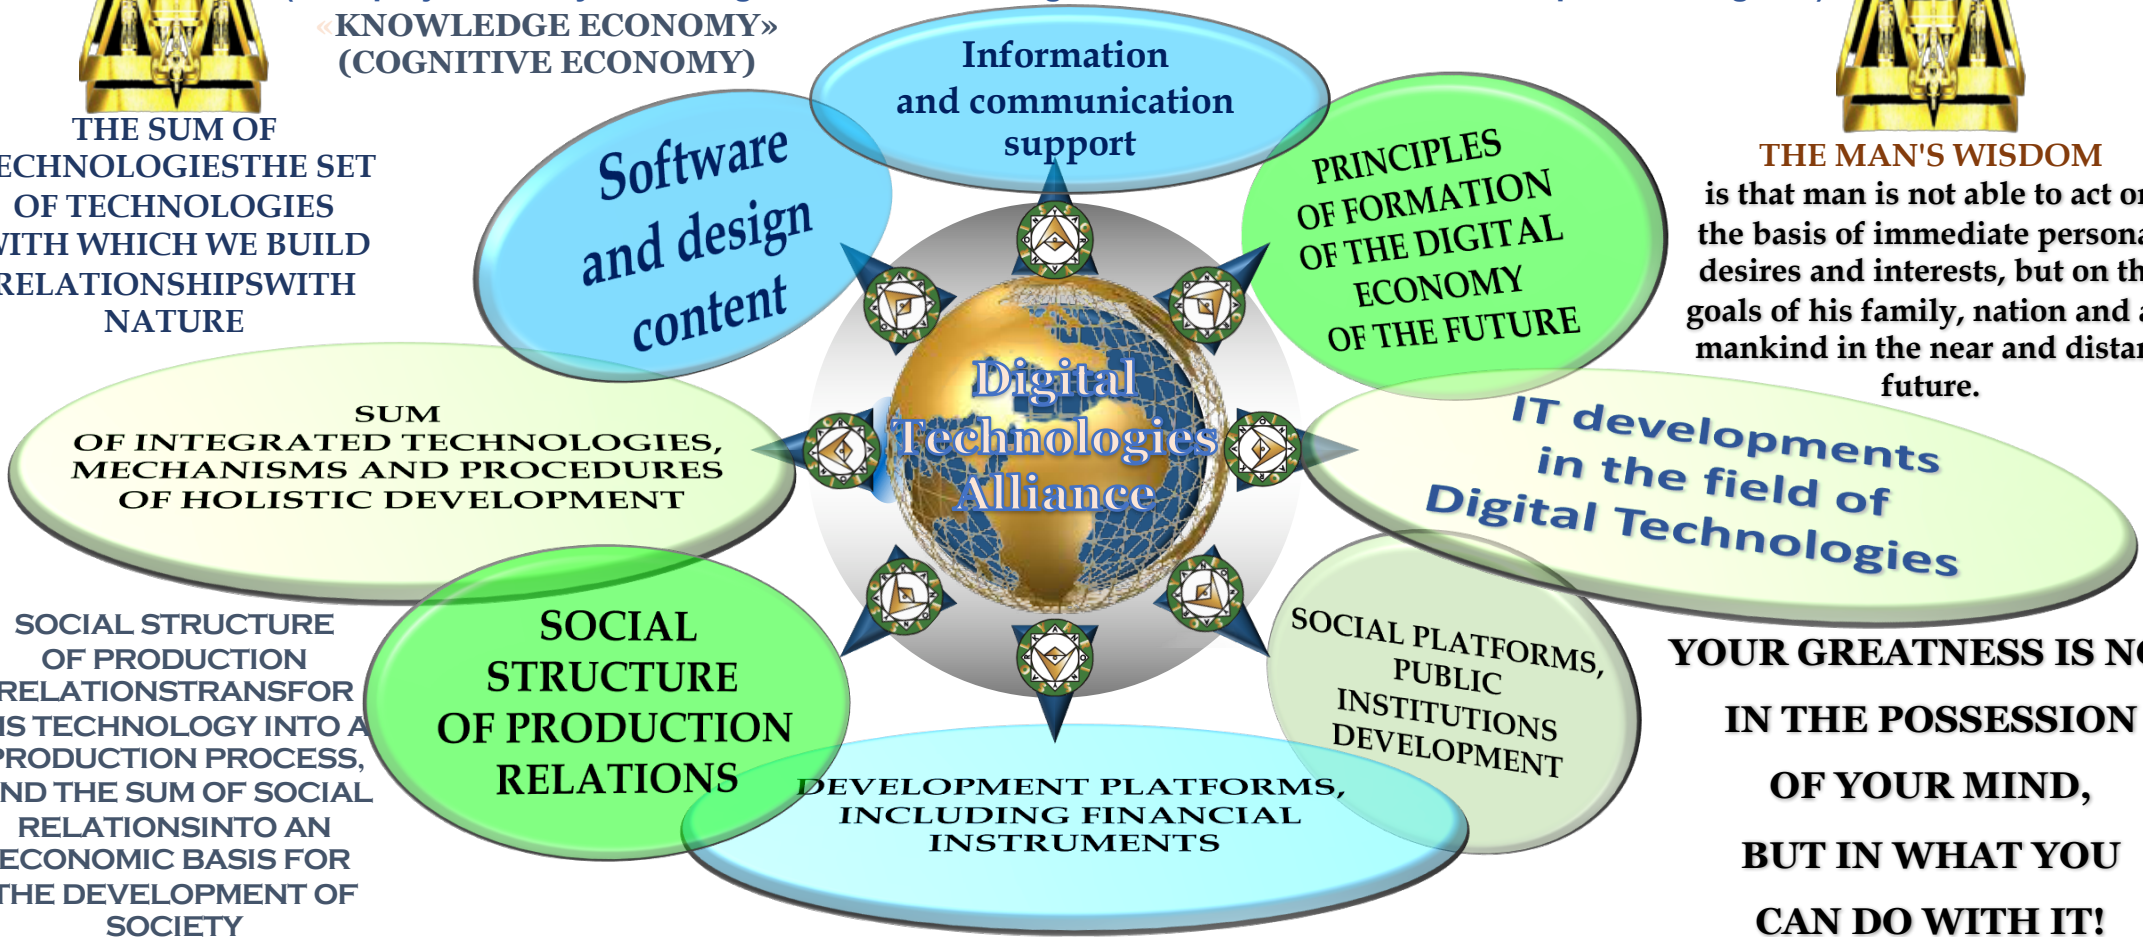

Creation of industrial and innovative complexes

(Pilot projects for system integration and attracting investment in innovative development of regions)

«KNOWLEDGE ECONOMY»
(COGNITIVE ECONOMY)

THE MAN'S WISDOM is that man is not able to act on the basis of immediate personal desires and interests, but on the goals of his family, nation and all mankind in the near and distant future.

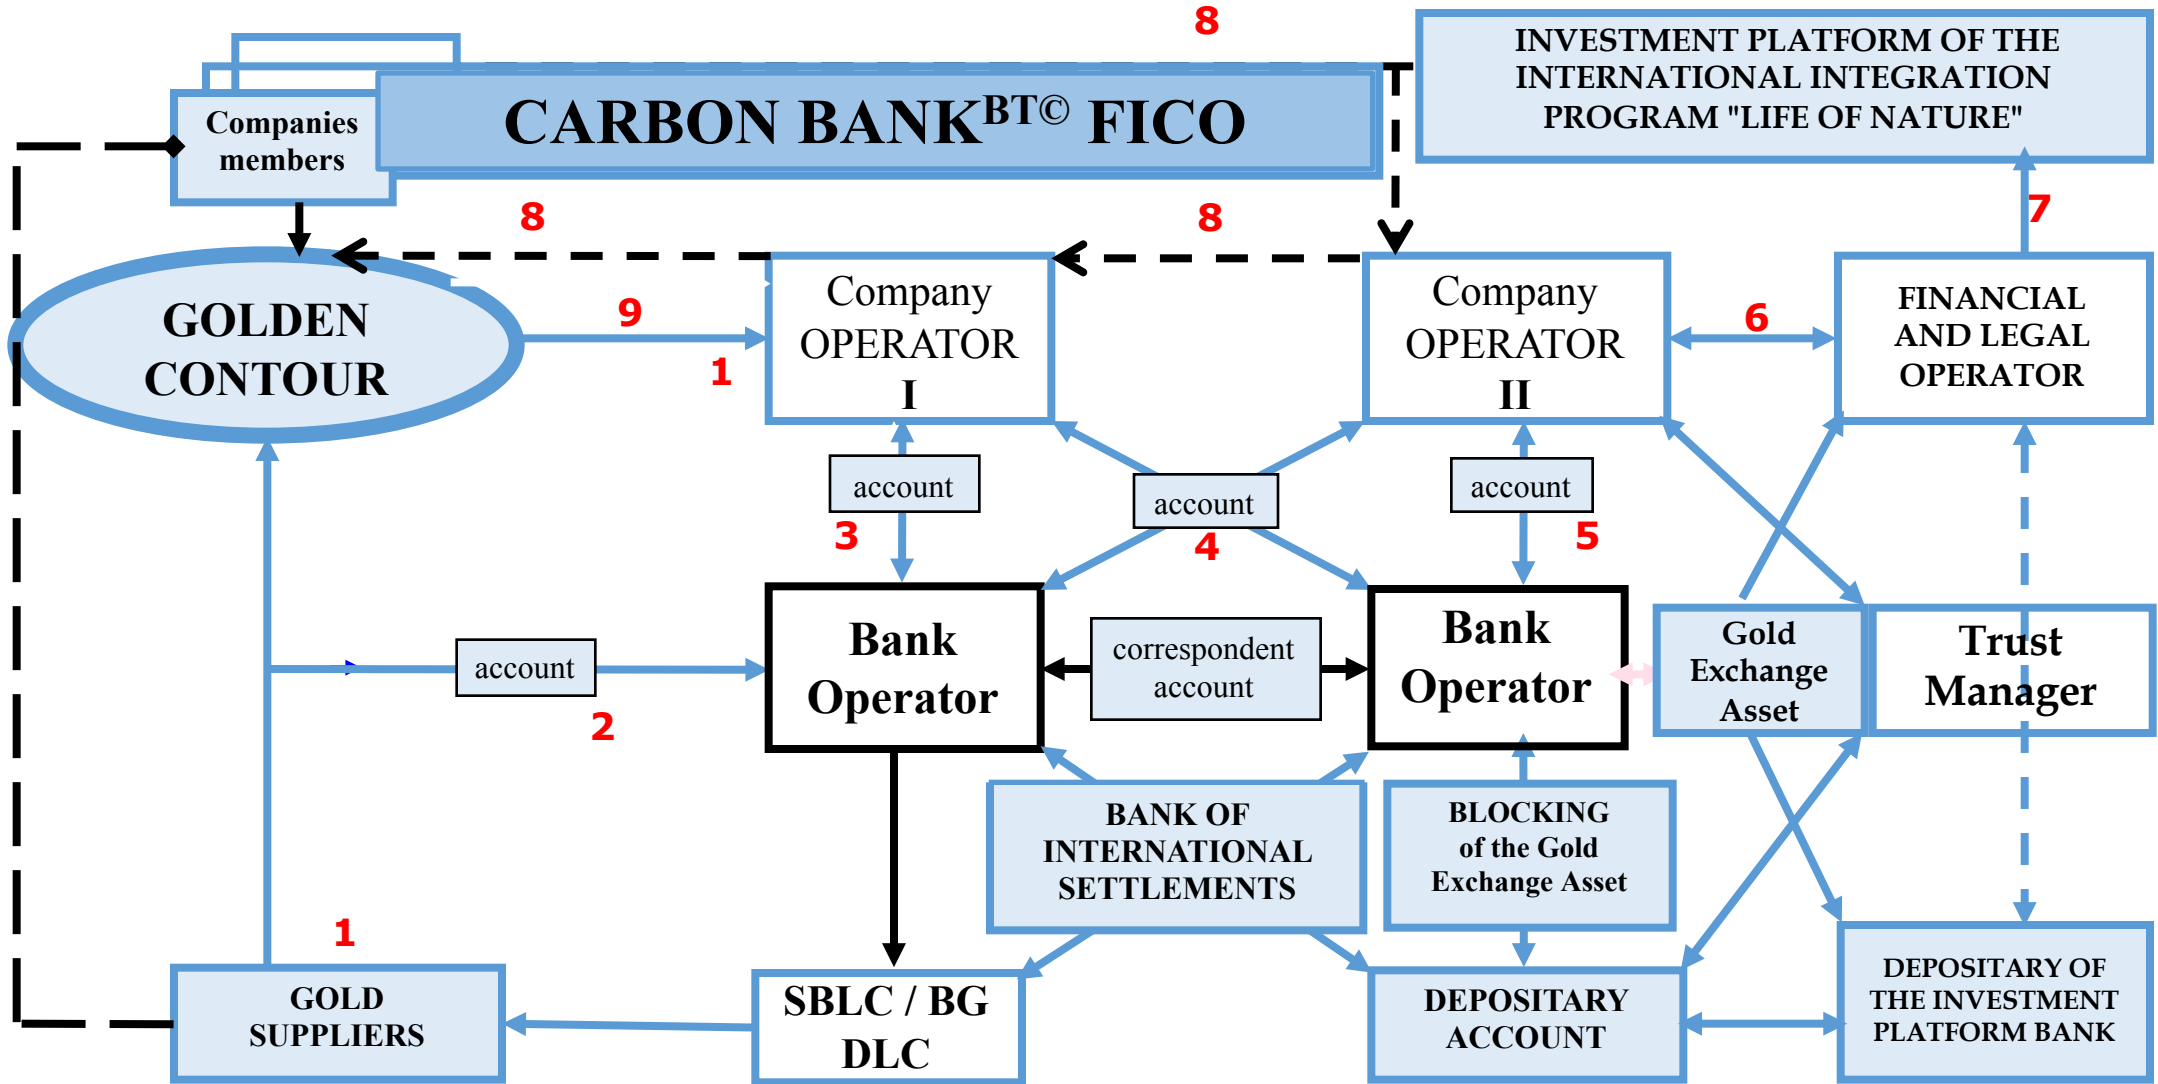

YOUR GREATNESS IS NOT IN THE POSSESSION OF YOUR MIND, BUT IN WHAT YOU CAN DO WITH IT!

AND WE ARE AT THE STAGE OF DETERMINING THE INTEGRATION BOUNDARIES OF THE DIGITAL ALLIANCE OF TECHNOLOGIES AND ITS EXPANSION BASED ON COMMUNICATION ALGORITHMS AND PROCESSES OF INTEGRATION OF CREATIVELY ACTIVE INDIVIDUALS IN ALL SPHERES OF SOCIAL AND ECONOMIC DEVELOPMENT OF THE GLOBAL COMMUNITY.

"TALENT IS IN THE IDEA, ART IS IN THE REALISATION!"

MARIA EBNER-ESCHENBACH

RESULTS OF THE PROJECT IMPLEMENTATION

AS A RESULT OF THE IMPLEMENTATION OF THE PROJECT OF INCUBATION DEVELOPMENT OF "CARBON FARMS" ON THE BASIC DIGITAL BASIS OF THE ORTHONOMETRIC COORDINATE SYSTEM «IMPERIUM DE©A®T CAPITAL^{BT}©» AND THE TRANSMISSION PROGRAM "TALENT", in the process of functioning of the second (or additional) digital circuit of money circulation, the following will appear:

- Systematic - Platform digital solutions for providing financing and servicing of trade transactions and investment programs (projects);
- Formation of new sources of funds for state needs, financing of the international innovation system (based on the assessment and capitalization of intellectual property), export-import activities of business entities - with the possibility of interest-free financing of cooperation between users of the Platform, as well as financing and servicing the formation of a basic income for citizens (over time, "unconditional"), which will become an indisputable driver of economic growth;
- Increase in domestic demand for domestic high-tech products (due to the formation of a basic income for citizens (over time, "unconditional") and the price competitiveness of goods and services;
- Minimizing inflation and attracting increased attention from investors by introducing a deflationary digital currency system backed by tokenized gold and other tangible and intangible resources.

Joint management of the circulation of investment capital is ensured in unions, associations, funds or agencies (innovative), grouping participants in investment processes on various capital circulation bases and operating in the status of legal entities on the existing legislative basis of state territorial entities, regulated in the international system of legal norms.

IDEOLOGICAL PARTNERS

Our recommendations for the development and implementation of a decentralized system of digital financial and legal technologies in various branches of science and industry are intended to assist partners in creating infrastructure elements of the innovative basic architecture for the development of the digital economy of the countries of the World Community and are based on the Communication Algorithms of the Integration Processes of Creatively Active Individuals United in their views on goal-setting in the Sphere of dissemination and integration of knowledge, experience and mechanisms that ensure guaranteed functioning at all stages of the implementation and development of digital technologies. These recommendations enhance the role of the natural growth of the resource of intellectual activity, based on the desire of people to implement their own ideas and projects and, thereby, provide decent conditions for a creative life for a HUMAN - a CREATOR.

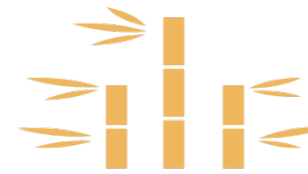

➤ **UNESCO**

➤ **INTERNATIONAL BANKS**

International integration of capital is mainly implemented in investment projects, whereby not only the property value of the means of production is socialized, but also capitalized income in the form of specific benefits for each Private Investor, regardless of the territory of His residence and citizenship.

➤ **INTERNATIONAL TRUST FUNDS**

➤ **INTERNATIONAL FINANCIAL CENTERS**

➤ **INTERNATIONAL HIGH-TECH PARKS**

Carbon farms

➤ **INTELLECTUAL RESOURCES MOBILIZATION GROUP**

➤ **DIGITAL PLATFORMS FOR ECONOMIC COOPERATION**

The legal regulations provided for in the legislative framework of countries, which provide support for the implementation of digital financial and legal technologies, make it possible to accelerate the creation of new organizational elements of the infrastructure for the development of the digital economy and create a favorable climate for attracting highly effective investments in quickly implemented projects, stimulating the vector of development of high-quality use of new equipment and technologies.

FORM OF ORGANIZING INTERACTION

- ❖ The form of organization of interaction is the State and Private Partnership for the creation of a Transmission Digital Platform for Economic Cooperation, based on the principles of funding and forms of balances of zero taxation of fund formations in the region, regardless of the system of trade relations.
- ❖ Launch methods - opening a regional order for the development, formation, regulation and introduction of the Security Tensor of the circulation of the entire family of tokens and cryptocurrencies of the TALANT transmission program under the regulation of the participating countries in the orthometric coordinate system «IMPERIUM DE©A®T CAPITAL^{BT©}».

THANK YOU FOR YOUR ATTENTION !

IF YOU SHOW:

- INTEREST AND NEED for a more in-depth study of the proposed new digital methods of network balancing and the creation of network-centric digital platforms;
- DESIRE AND POSSIBILITIES OF INTEGRATION and data synchronization on the Cross-platform «CARBON BANK^{BT©} SATELLITE SYSTEM^{IDC}»;
- QUESTIONS OF JUSTIFICATION AND CONSIDERATION OF THE KEY ADVANTAGES of using the proposed digital Cross-platform «CARBON BANK^{BT©} SATELLITE SYSTEM^{IDC}» based on the Network-centric Architecture (Net-centric Architecture) using Service-Oriented Architecture (SOA), WE WILL PROVIDE YOU WITH MUTUAL CONTACTS BETWEEN OUR SPECIALISTS.

With respect,

MRS. RIMMA S. MANDZHEVA

General Director

The criterion for modern economic development should not only be the level of raw material extraction or the volume of industrial production, but the expansion of human opportunities to demonstrate their creative individuality in economic activity with an awareness of full responsibility for all decisions they make.

The digital transformation of the economy contributes to both the growth of the number of thinking, energetic and closely interacting people, and sets a progressive ECOLOGICAL VECTOR of the Social Form of Public Development, when thought, freedom and energy will correspond to a higher conscious spiritual level of life.

Digital transformation is a universal technological tool for the creative path of development of the present and future of all mankind in harmony with nature and each person with himself!

If the working principle and mechanism are clear,

The organisational structure and legal design is always achievable!

THE TREE THAT FRAMES THE TRUTH GROWS FROM THE KERNEL OF THE SEED TO THE ROOTS AND TO THE STEM, DIVIDING INTO BRANCHES AND BRINGING ITS FRUITS FOR THE DEVELOPMENT OF LIFE BY HERITAGE!

By inviting into the orbit of the International Integration Program "LIFE OF NATURE" for the implementation of the PROJECT OF INCUBATION DEVELOPMENT OF "CARBON FARMS" the heads of large concerns, oil and gas companies, famous politicians, bankers and leading scientists from different countries of the World, we create the sprouts of restoration of NATURE on our Planet, gradually erasing the boundaries of the conflict of civilizations, the conflict of religions, interethnic conflicts and set a new Ecological vector of the Social Form of Public Development of events, which leads to the unification of all in the entire Planetary space, opening in the future the paths to creation and fruitful cooperation with all the Peoples of the World and will bring its creative fruits, in the interests of the development of all Humanity and the Preservation of LIFE ON PLANET EARTH.

THE PRESERVATION OF OUR CIVILIZATION, ITS ECONOMIC AND SOCIAL PROGRESS DEPENDS ON THE DECISION OF EACH OF US.

FOR THIS, THE COMBINED EFFORTS OF NOT ONLY SEPARATE STATES, BUT OF ALL HUMANITY AS A WHOLE ARE NECESSARY.

MAY OUR BLESSED UNION BE THE MOST BRIGHT EXAMPLE OF CREATION AND COOPERATION FOR ALL THE PEOPLES OF THE WORLD, DETERMINING OUR FUTURE AND OUR TRUE PATH TO SPIRITUAL PERFECTION FROM THE ORIGINS OF OUR ANCESTORS, WITH A MESSAGE FROM THE PAST TO ALL HUMANITY WITH A CALL FOR SPIRITUAL UNITY OF ALL PEOPLES

IN THE NAME OF PRESERVING LIFE ON EARTH.
